

Dolphin Training & Research Internship

MARINE MAMMAL SCIENCE • TRAINING • RESEARCH

Learn alongside RIMS marine mammal professionals in Roatan.

Explore marine mammal science firsthand.

The Roatan Institute for Marine Sciences is excited to offer a four-week Dolphin Training & Research Internship this summer. The program is open to upper-level undergraduate students and recent graduates and is limited to 12 interns. Interns will live and work at our facility, gaining valuable research and field experience as they get to know our resident population of bottlenose dolphins and receive an invaluable introduction to the training process.

MARINE MAMMAL SCIENCE

BEHAVIOR & RESEARCH

TRAINING & CARE

Under the direction of a senior dolphin trainer or biologist, interns will take part in a wide range of activities and gain experience and skills to help prepare them for future employment and research opportunities in marine mammal science. Interns will:

- Attend in-depth lectures on topics such as evolution, anatomy, physiology, echolocation, reproduction, cognition, communication, conservation, and social dynamics.
- Use field research methods to observe and record behavioral interactions.
- Learn marine mammal training techniques.
- Assist with dolphin husbandry and animal care management.
- Develop and carry out an independent research project.
- Work with a dedicated and caring team of marine mammal professionals.

- **Build experience in marine science, animal care, and research.**
